

Estimating Your Museum Visit Time

Artwork Density Guide

	A	B	C	D	E	
1	locationid	count_objects				
2	3592	1				
3	3594	2				
4	3618	1				
5	3620	2				
6	3809	1				
7	3810	2				
8	3812	2				
9	3921	1				
10	3924	2				
11	3925	6				
12	3926	3				
13	3933	1				
14	3934	1				
15	3935	1				
16	3936	2				
17	3949	1				
18	3956	6				
19	3957	3				
20	3958	4				
21	3959	3				
22	3968	1				
23	4167	1				
24	4206	2				
25	4208	1				
26	4278	10				
27	4279	5				
28	4280	6				
29	4281	4				
30	4296	1				
31	4460	1				
32	4461	10				
33	4466	2				

For this approach I created a csv using R Studio to list all locations that were open to public and count the number of objects in those locations.

```
<script>
// Use D3 to fetch the CSV data
d3.csv("Desktop/Parsons/Studio1/data/count.csv")
.then(function(data) {

    console.log(data);
})
.catch(function(error) {

    console.error("Error loading the CSV file:", error);
});
</script>
```

I would need ID-s for locations that are not on view to assign a value to them as well.

The next step would be mapping these locations on the floor plan assigning each room on the floorplan the locationid.
